

Maintenance and operation of wastepipe renovated with the Aarsleff Wastepipe

A drainage system consists of drainage installations from kitchens, bathrooms, toilets, production facilities, etc., as well as installations below and above ground, such as roof drains, flushing wells and branch pipes.

From these installations, rainwater and wastewater are led to the public sewer network.

Wastepipes

The Aarsleff waste pipe is made of felt and impregnated with epoxy, and it has an inner foil made of polypropylene or polyurethane. In its hardened form, the Aarsleff wastepipe can be compared to drainage systems made of prefabricated plastic materials. In its hardened state, the wastepipe lining is very resistant, but can be damaged by incorrect treatment.

Aarsleff provides a 15-year warranty on the durability of the sock liner – provided that the following instructions are documented:

Use and maintenance:

- The sock liner must not be in contact with water above 90 °C for more than 5 minutes at a time.
- The sock liner must not be exposed to chemical influences beyond the normal use of gentle cleaning agents.
- Frying oil, stearin and the like must not be poured down the drain.
- Kitchen drains must be thoroughly flushed with hot water every 5 years.
- Toilet drains must be thoroughly flushed with clean, cold water every 10 years.
- Flushing should last 5-10 minutes.

Cleaning:

- High-pressure flushing with a rotor nozzle at a maximum of 70 bar.

Do not use:

- Cutting or pointed tools, e.g. motor splitter with cutting head.
- industrial flushing.
- Boiling water, caustic soda (liquid drain opener) or other chemicals to open a clogged pipe, as it corrodes the plastic material.

The warranty does not cover:

- Clogging that is not due to defects in the Aarsleff hose or installation of the hose in the pipe.
- Damage resulting from lack of maintenance or use contrary to these instructions.
- The warranty is void if any intervention is made in the hose-lined downspout without prior contact with Aarsleff.

At Aarsleff Rørteknik we are ready to provide guidance, and you are always welcome to contact us on 87442222.

Best regards
